PREFACE	xiii
----------------------	-------------

Section I: Overview of Polyolefins and Additives

CHAPTER 1	Introduction	3
	1.1 Importance of POs	3
	1.2 Importance of PO additives	4
	1.3 Recent issues in using additives.....	5
	1.3.1 Matching property requirements with additive type and amount	5
	1.3.2 Doing more with less material	6
	1.3.3 New properties for new markets.....	7
	1.3.4 Unintended additive interactions	7
	1.3.5 Faster processing	8
CHAPTER 2	Trends in Polyolefin and Additive Use	9
	2.1 PO market trends.....	9
	2.1.1 Growth vs. volatility	10
	2.1.2 Future resin growth and prices	10
	2.2 Overall trends in additives production and use.....	11
	2.3 Trends in resin compounding	12
	2.4 Trends in specific PO applications.....	13
	2.4.1 Packaging trends	14
	2.4.2 Automotive trends for POs.....	16
	2.4.3 Construction and infrastructure application trends	18

Section II: Environmental Resistance

CHAPTER 3	Antioxidants and Heat Stabilization	25
3.1	Importance of AOs and stabilizers for POs	26
3.2	Primary and secondary AOs	29
3.2.1	Primary AOs (radical scavengers)	29
3.2.2	Secondary AOs (peroxide decomposers)	31
3.3	Factors determining AO selection	33
3.3.1	Thermal and color requirements in melt processing and in service	36
3.3.2	AO selection by PO type and finished product form	37
3.3.3	AO physical forms and handling	38
3.3.4	Synergies and antagonistic interactions	38
3.3.5	Cost	40
3.3.6	Environmental, food-contact, and health and safety considerations	41
CHAPTER 4	Ultraviolet Light Protection and Stabilization	45
4.1	UV degradation of POs	47
4.2	UV blockers, screeners, and absorbers	48
4.2.1	UV-blocking and -absorbing fillers and pigments ..	48
4.2.2	Organic UV absorbers	50
4.3	Quenchers and peroxide decomposers	51
4.4	HALS: Free-radical scavengers	51
4.4.1	Overview of HALS	51
4.4.2	Interactions of HALS and other additives	53
4.5	Factors determining stabilizer selection	55
4.5.1	General factors	55
4.5.2	Light stabilizers for specific PO applications	56
CHAPTER 5	Flame-Retarding Additives	61
5.1	Overview: The need for flame-retardant formulations ...	61
5.1.1	Trends in flame-retarding additives	61
5.1.2	Mechanisms of burning	62
5.2	Halogen-based flame retardants	63
5.2.1	Composition of H-FRs	64
5.2.2	Concerns about halogenated FRs	66
5.3	Mineral-based flame retardants	68
5.3.1	ATH and MDH	68
5.3.2	Other mineral fillers' FR effects	69

5.4	Intumescent and phosphorous-based flame retardants ..	70
5.4.1	Mechanisms of phosphorous FRs	70
5.4.2	Issues in improving phosphorous FRs	71
5.5	Factors determining the selection of FR additives.....	72
5.5.1	Cost, risk, and performance	74
5.5.2	Property effects and co-additive interactions.....	75
5.5.3	FR density and form.....	76
5.5.4	Halogen-free benefits (and costs).....	77
CHAPTER 6	Additives for Modifying Electrical Properties	79
6.1	Antistatic and ESD additives.....	79
6.1.1	Migrating chemical antistats	81
6.1.2	Nonmigrating polymers as permanent antistatic/ESD additives	85
6.1.3	Conductive fillers as antistatic/ESD additives.....	86
6.2	EMI shielding.....	88
6.2.1	Conductive fillers for EMI shielding	88
6.2.2	Conductive fibers for EMI shielding	89
6.3	Choosing antistat/ESD/EMI additives	89
6.3.1	Antistat selection factors	89
6.3.2	Design considerations for EMI shielding	90
 Section III: Mechanical Property Enhancement		
CHAPTER 7	Overview of Fillers and Fibers	95
7.1	Importance of fillers and fibers for POs	96
7.2	Common inorganic fillers.....	96
7.2.1	Calcium carbonate	97
7.2.2	Talc.....	98
7.2.3	Wollastonite.....	99
7.2.4	Mica.....	100
7.2.5	Silica	101
7.2.6	Glass flour and spheres	101
7.2.7	Other microfillers	102
7.3	Nanofillers	103
7.3.1	Potential of nanofillers.....	103
7.3.2	Platy nanoclays	104
7.3.3	Nanotubes	105
7.3.4	POSS nanomaterials.....	106
7.4	Impact modifiers and TPOs	107
7.4.1	Impact modification for thick products	108
7.4.2	Impact modification for film and sheet.....	109
